THE 48-HOUR EDITION

NASA Releases MAX POWER Key Events for Media, Participants

AmAmerica’s newest aerospace expo and air show – MAX POWER – is fast approaching, and NASA has announced key events beginning Friday, Nov. 6, and running through Sunday, Nov. 8, hosted on and near the agency’s Kennedy Space Center in Florida. Through multiple park experiences at MAX POWER, NASA and a variety of external collaborators […]

THE EDITION

Inside the last 48 hours

Reports are kept close to their original sources. Dates, credits and links are preserved so every reader can follow the evidence.

01	NASA Releases MAX POWER Key Events for Media, Participants	30 Oct 2026
02	NASA's James Webb Space Telescope Captures Eerie Cat's Head	30 Oct 2026
03	NASA’s James Webb Space Telescope Captures Eerie Cat’s Head	30 Oct 2026
04	NASA Explores Potential Commercial Servicing for Hubble Telescope	30 Oct 2026
05	November’s Night Sky Notes: Light-Day Away	30 Oct 2026
06	APOD: 2026 October 30 – Haunting the Cepheus Flare	30 Oct 2026
07	Vega Island Frozen in Fright	30 Oct 2026
08	Map Showing Potential Origins of Martian Meteorite Teghaza 001	30 Oct 2026

EDITOR'S NOTE

A short window on a moving universe

This edition gathers 8 source-linked reports published within the previous 48 hours. The Publisher collected the source records; the Universal Editorial Engine selected the eligible items, preserved their provenance and arranged them using this edition's brief. The summaries remain source-led. They do not replace the linked reporting, technical detail or stated limitations.

CUSTOM EDITORIAL REQUEST

Create a minimal, light-editorial, text-led 8-page Space Journal. Include an explainer, a timeline, source notes, visible credits and a strong closing page. Avoid documentary images.
